Science Homework

Choose an insect and create a factfile about it. You need to include:

- subheadings
- Images
- Details about its appearance
- Scientific language
- Special characteristics

Dragonflies

HABITAT (HOME)

- Young dragonflies live in freshwater such as small streams and ponds.
- Adult dragonflies may travel away from water while hunting or migrating.

DIET (FOOD)

- Dragonflies eat other insects such as mosquitoes, ants, termites, butterflies, gnats, and bees.

BODY COVERING

- A dragonfly's body is covered by a hard skeleton. It is called an exoskeleton.

FUN FACTS

- Young dragonfly nymphs breathe using gills in their abdomen.
- Dragonflies are the fastest insects. They can fly more than 30 miles per hour.

Homework is due on: 11.12.18
